

GREEN CO-ORDINATES

We can see more variations of green than any other colour, it is the color of spring, of renewal and restoration. Green is the most common color in the natural world, it is the sanctuary away from the stresses of modern living, restoring us back to a sense of well being.

We have a wide range of carpets that incorporate the colour green in the design.

The following pages include some of our favourite green colour combinations to provide inspiration and guidance on how to create an Ulster scheme which flows from room to room.

Ulster Velvet
Glacier W2624

Watercolours Mineral
Seaglass 91/20089
